PROFILE

Founder of TheLumiNos, a digital agency delivering MERN stack and SEO solutions for multiple clients. I am the lead developer of Nirvhoy, a project recognized at a national hackathon in Bangladesh for its impact on combating technology-facilitated gender-based violence. Beyond my technical expertise in Python and React, I serve as the Director of Event Management at the multicultural club at BRACU, where I lead large-scale operations and cross-functional teams.

WORK EXPERIENCE

TheLumiNos 2025 - PRESENT

Founder & CEO

- Direct the development of end-to-end web and software solutions using the MERN stack, Python, and React for a diverse portfolio of clients.
- Oversee comprehensive Digital Marketing and SEO strategies for multiple brands, driving growth in the Agro-tech, Food & Beverage, and Retail sectors.
- Lead cross-functional teams to deliver custom automation and high-performance websites, ensuring technical excellence and commercial scalability.

National TFGBV Hackathon FEB 2026

Project Lead (Nirvhoy)

- Achieved First Runner-Up at the National Technology-Facilitated Gender-Based Violence (TFGBV) Festival for the development of "Nirvhoy."
- Engineered a specialized reporting and support system designed to provide safe, tech-driven resources for victims of digital harassment.
- Presented the technical architecture and social impact roadmap to a panel of national experts, highlighting the intersection of coding and social advocacy.

BRAC University Multicultural Club 2026 - PRESENT

Director of Event Management

- Lead the end-to-end execution of the club's annual event calendar, overseeing multiple large-scale cultural and social programs for the university community.
- Directed "My Country, My Culture 2.0," the club's largest flagship event; independently managed a team of 64 volunteers to deliver a seamless multi-cultural showcase.
- Manage cross-functional logistics, including budget allocation, venue procurement, and stakeholder communications for various high-attendance events.

- Drive student engagement and cultural awareness by streamlining event operations and fostering a collaborative environment for diverse volunteer teams.

EDUCATION

Bachelor of Science in Computer Science 2023 - PRESENT
School of Data and Sciences | BRAC University

Higher Secondary Certificate (HSC) 2022
Bogura Cantonment public school & College
GPA: 5.0 / 5.0

Secondary School Certificate (SSC) 2020
Bogura Cantonment public school & College
GPA: 5.0 / 5.0

PROJECTS

Nirvhoy (National TFGBV Reporting System) Technologies Used: MERN Stack, Python, React, Cloud Integration

- Achieved First Runner-Up at the National Technology-Facilitated Gender-Based Violence (TFGBV) Festival for this high-impact social project.
- Engineered a comprehensive, secure reporting platform designed to combat digital harassment and provide streamlined support for victims.
- Developed the end-to-end architecture to ensure data privacy and real-time connectivity between users and support services

CivicAi (National AI-Powered Governance Platform) Technologies Used: AI, Cloud Infrastructure, Multi-platform Integration

- Developed as a Finalist project for VisionX, a premier national AI-powered project demonstration in Bangladesh.
- Built a smart digital bridge between the citizens and the government of Bangladesh, leveraging AI to streamline communication and public service access.
- Focused on creating a high-level digital interface to improve transparency and ensure government-to-citizen connectivity at scale.

Blueee (Voice Assistant Personal Project) Technologies Used: Python, pyttsx3, Gmail API, AccuWeather API, JSON, PyInstaller

- Custom voice assistant for weather, emails, math, reminders, and notes.
- Features: Google Speech Recognition, pyttsx3 TTS, and JSON-based data handling.
- Packaged into a standalone .exe with no external dependencies.
- GitHub Repository: The entire project is hosted on GitHub, with a well-structured repository and clear setup instructions.
